

Katowice 1998-07-16

To whom it may concern:

This is to confirm that Janusz Latusek Construction Company was the general contractor in a renovation project at 9 Kossutha St. in Katowice in 1997/1998. The total renovated area was 4,000 sq. meters. The building houses now operations of Polska Telewizja Kablowa and a satellite television operator Wizja TV. It includes offices, television studios, a computer center and customer service center for 130 stations. The work performed by Janusz Latusek was of superb quality and fully met expectations of the demanding, mostly American, investors.

The project was completed on a very tight schedule, under tremendous pressure to meet tight deadlines. The occasional changes of specifications and shortage of proper documentation for the renovated object required a lot of creativity and ability to adjust the work process to changing environment. Despite the complexity of the project, all issues among the contractor, investors, designers and others involved were resolved swiftly, professionally and without conflicts.

We are fully satisfied with the work performed by Janusz Latusek Construction Company and would always recommend their services in the future.
